NEXT Black Sea Basin

STURNET

INVITATION

International Round Table

"Sturgeon conservation and monitoring in the Black Sea"

11 December 2026 | 10:00–14:00

Burgas, Flora Expo Center, Hall 2

Dear Sir or Madam,

The Protection of biodiversity in Bulgaria Foundation, a partner in the SturNet project, invites you to an international round table dedicated to sturgeon conservation in the Black Sea and the opportunities offered by digital technologies for monitoring and protecting these species.

The meeting will focus on how acoustic telemetry data can inform practical measures to protect sturgeon and tackle illegal fishing. Researchers, institutional representatives and conservation organisations will have an opportunity to exchange experience and ideas.

We will discuss how acoustic telemetry tracks tagged sturgeon and how SturNet's digital tools can help use the data to plan conservation measures and strengthen cooperation across the Black Sea region.

We would welcome your experience, observations and proposals, and your contribution to the discussion on the future of sturgeons in the Black Sea.

Working languages: Bulgarian and English.

Registration: Registration form

Contact: Elena Georgieva, +359 885 557 491

The event is organised with logistical support from OPIMOS Association.

We look forward to welcoming you.

The team of the Protection of biodiversity in Bulgaria Foundation
